

Blue Earth Research and Madeira Beach to Promote Sea Turtle Protection

Blue Earth Research and Sand to Sea will host a group of City of Madeira Beach Commissioners in the effort to promote the protection of sea turtles. The turtle excavation event will be held at 10:30 a.m., Thursday August 2, 2018 on Madeira Beach at 13336 Gulf Lane, the Chambre Beach Apartments.

Blue Earth Research and Sand to Sea turtle experts will talk about the importance of sea turtle protection ordinances, public education and community awareness. The event will be highlighted by the excavation of a hatched sea turtle nest and the City of Madeira Beach officially adopting a nearby soon-to-be hatched sea turtle nest.

One or more Elected or Appointed Officials may be in attendance. The public is welcome to attend. This event is intended to allow community stakeholders (residents, business owners, visitors, etc.) to gather with elected officials in a social, non-official setting. No city business will be discussed at this event.
